SUMMARY

Final-year B.Tech AI & Data Science student building agentic AI workflows and RAG pipelines. Comfortable with LangChain/LangGraph, vector databases, prompt engineering, and Python backend development, with a deployed multi-user RAG application and a live semantic search API to show for it. Looking to join an engineering team building production GenAI systems.

TECHNICAL SKILLS

- **Languages & Dev:** Python, SQL
- **AI / ML:** Machine Learning, Deep Learning, NLP, LLMs, Transformers, PyTorch, Pandas
- **GenAI & RAG:** LangChain, LangGraph, RAG (chunking, embeddings, retrieval, grounding), ChromaDB, OpenAI API, Groq, HuggingFace
- **Tools & DevOps:** FastAPI, Streamlit, Docker (basics), pytest, Git/GitHub

PROJECTS

NeuralRAG — Agentic Retrieval-Augmented Generation System (2025 – 2026)

LangGraph • ChromaDB • OpenAI / Groq API • HuggingFace • Streamlit • Python

- Built and deployed an agentic RAG pipeline using LangGraph for multi-step reasoning, with document chunking, vector embeddings, and ChromaDB retrieval to ground LLM responses in source documents; used by others beyond myself.
- Added domain-filtered web search, a trusted-sources system with JSON persistence, and source-transparency labels so users can see where each answer's evidence came from.
- Built a query-routing agent for summary-intent classification and refactored the Streamlit UI into a production-ready, workspace-extensible architecture.

Intelligent Search Engine (2025)

Python • FastAPI • Vector Embeddings • Semantic Search • Deployed on Render

- Built a semantic search engine using vector embeddings and similarity ranking to surface contextually relevant results beyond keyword matching.
- Implemented a FastAPI backend and deployed it on Render, where it's still live and has been used by people outside myself.

Customer Churn Prediction (2025)

Python • Scikit-learn • Pandas • NumPy • Machine Learning

- Built a supervised ML classification model on a public Kaggle churn dataset — feature engineering, preprocessing, and evaluation with precision/recall metrics.

EDUCATION

B.Tech, Artificial Intelligence & Data Science (Expected May 2027)

Sri Shakthi Institute of Engineering and Technology, Coimbatore, Tamil Nadu

CERTIFICATIONS

- Introduction to Prompt Engineering — Simplilearn SkillUp (Feb 2026)
- Data Visualization: Empowering Business with Effective Insights — Tata Forage (Aug 2025)
- AI for All (AI Aware & AI Appreciate) — Intel, CBSE & Govt. of India (Jul 2025)
- Introduction to Data Science & NLP — Infosys Springboard (Jun 2025)
- Career Essentials in Generative AI — Microsoft & LinkedIn Learning (Aug 2024)

ACHIEVEMENTS

- Secured 15th nationally at VIT Hackathon (AI/ML track) with 86% accuracy on a Medical AI Chatbot; active participant in technical group discussions and AI engineering events.
